

FOR RENT

The Commodious Business Building on the Northwest Corner of Public Square. One of the best business stands in the city of Farmington. Apply to

J. C. WILLIAMS
Or WM. O'SULLIVAN

COUNTY CORRESPONDENCE

DOE RUN

Mrs. Effie Isom of Illinois was visiting friends and relatives here the past week.

Mr. and Mrs. Dan O'Sullivan and daughter, Mae, attended the funeral of Mrs. O'Sullivan's sister in St. Louis last Sunday.

Mrs. Mary Eaves and daughter, Dell, of Desloge were visiting the former's parents, Mr. and Mrs. Joseph Crader here Saturday and Sunday.

James and Samuel Crawford are working in Elvins this week.

Miss Blanche Dees was visiting in Flat River last week.

Adam Meyer of Herculaneum is visiting home folks here this week.

Ed Zimmerman of Farmington visited John Brewen here Sunday.

Miss Letta Sheets of Farmington was visiting here the latter part of last week.

Mr. Fletcher Mitchell and daughter, Rose, of Caledonia were visiting here the latter part of last week.

Mr. Marvin Harvey of Elvins was visiting here Sunday.

Mrs. P. P. Gruner and Miss Cynthia Gruner were Farmington visitors Saturday.

Mrs. Finis Boyd and children of Flat River visited Mrs. Ann Elser of this place Saturday and Sunday.

Mr. Will Alexander of near Farmington was here on business Saturday.

Carl Schaffer was in Farmington Saturday and Sunday.

Mr. Eugene Sizemore and wife and children were in Farmington Saturday.

Mr. Wm. Rosenstengel and children visited relatives in Esther Sunday.

Mrs. W. A. Baugh returned to Morehouse Sunday. She has been visiting her parents, Mr. and Mrs. John Boswell, the past few weeks.

Miss Bessie Boswell was visiting relatives in Desloge.

Mrs. John Hulsey and son, George, were in Farmington Monday.

Joe Faulkner was visiting relatives here Saturday and Sunday.

M. T. Reed was a business visitor in Farmington recently.

B. I. Morris was visiting here Thursday.

Mr. and Mrs. Marion Matkin and children, Ethel and Philip, were visiting in Farmington Saturday.

Misses Lillian Gruner and Tella Schaffer were in Farmington Saturday.

Mr. and Mrs. Jim LaGrant and little grandson of Arkansas were visiting here last week.

Mrs. John Boswell and Mrs. Charley Yeager were visiting in Desloge the first of the week.

H. B. Reed was visiting his family Sunday evening.

Mr. Joe Crader was visiting his son in Esther the latter part of last week.

Mrs. Martha Ross was visiting her son, William, in Bonne Terre last Sunday.

Miss Kora Keeling was visiting her sister, Mrs. J. M. Brannon, of Farmington last week.

Mr. Andrew Silvey of south of Farmington was visiting Mr. and Mrs. Fred Henrich.

Mr. and Mrs. Sam Brim moved to Bismarck Saturday.

Miss Ethel Thomure was visiting grand parents, Mr. and Mrs. John Fairchild, at River Mines the latter part of last week.

Mr. Thos. McCutcheon is visiting home folks here.

The latest fashions in Millinery at Mrs. S. C. Watts'.

Mr. Adam Keeling and wife and children were in Farmington Saturday on business.

Cecil Flannery of Flat River is visiting his grandmother, Mrs. Bill Flannery.

Mr. P. P. Gruner was a business visitor at Farmington Tuesday.

Miss Lillie Gruner visited in Farmington Tuesday and Wednesday.

There was a surprise party given to Miss Lydia Zimmer at the home of Mr. and Mrs. Fred Zimmer Wednesday, the 12th. Those present were Misses Alma, Fredia and Lydia Zimmer, Susie Keeling, Emma Hertz, Tilda Schaffer, and Messrs. Fred Keeling, Hobart Schaffer, Lewis Hertz, Freeman Zimmer, Willie Keeling and Philip Henrich, and Mr. and Mrs. Adam Keeling, Mr. and Mrs. Fred Henrich, Mr. and Mrs. Fred Zimmer, Mrs. Henry Antoine and Mrs. Martin Fleming were in Farmington Tuesday.

CROSS ROADS

Lou Welty spent over Saturday night at Farmington, the guest of relatives there.

Viola Keannon was a Mine La Motte visitor Saturday morning.

Chas. Tesreau went to Mine La Motte Saturday to accept a position in the Mine La Motte store. We wish him success.

William Lenz transacted business in Fredericktown Saturday.

Lon Green purchased a horse from Joshua Beard of Mill Creek last week.

Wm. Lenz celebrated his 56th birthday on last Thursday.

You'll find the style and price right. Buy your Summer Hat from Mrs. S. C. Watts.

Dr. Dines of Fredericktown was transacting business in this community last Friday.

Dora Lenz spent the week-end with her uncle, Geo. Lenz, and family at Womack, and attended services at the M. E. Church.

Mrs. Wm. Tesreau was the guest of Mrs. John Banes at Mine La Motte last Tuesday.

Mr. Clark's family have moved from Loyd Ferguson's house into Mr. L. B. Meredith's house.

Cris Heitman of the Lead Belt purchased a span of mules from Wm. Lenz on last Saturday for which he paid a fancy price.

Mrs. Geo. Lenz and daughters, Orena and Mary Frances, of Womack spent Monday at the home of Wm. Lenz and family.

Several of the young people from here attended services at the M. E. Church at Womack Sunday night.

J. B. Dines and Joshua Beard were business visitors in this community on last Friday.

OAK GROVE

Harve Bowling of Flat River spent Saturday and Sunday around Oak Grove.

Joel Hammors is repairing fence around his new farm of this locality.

Bradley Williams of Flat River spent a few days recently around Oak Grove.

Miss Gladys Thompson spent Saturday and Sunday with Miss Iva Johnson.

The Chestnut Ridge school will be out the 21st. Chestnut Ridge school house is well equipped for a country school. And Mr. E. S. Womack, the teacher, states that he has been treated well by every one, and is thankful for the co-operation of the people around the school and also the directors. Mr. Womack is a fine teacher any way you take him, and is well liked by all.

Mr. Thos. Gregory and mother came from Illinois last Sunday, where they attended the funeral of the latter's daughter.

Harry Wampler of Flat River spent a few days around Chestnut Ridge recently.

Misses Audie and May Bloom spent Saturday and Sunday with Misses Hazel and Beulah Wampler.

Those who spent Sunday afternoon with Mr. John Wampler and family were Mr. and Mrs. Ed Bloom, Mr. and Mrs. F. F. Harter and sons Emmett and Joseph, Wisle Vaughn and sons Paul and Allen, and Louis and Virgil Bloom. All report a jolly time.

Last Saturday night was the last vocal lesson that Mr. John Simpson will give at Pleasant Hill. Mr. Simpson sure taught a successful vocal school.

Miss Alma Watts spent Saturday and Sunday with home folks in Farmington.

Everet Coleman motored to Halifax last Saturday and back Sunday.

The farmers of this community are getting ready to plant their corn as soon as it is warm enough.

Don't forget the roads. Everybody join the band and work the roads more than plenty.

Miss Elvie Wampler is visiting relatives in Farmington and Flat River.

The base ball game at Mr. Joel Hammors was carried on with success last Sunday. The team will soon be ready to play with any one who wants to have a match game.

Mrs. Alex. Gordon spent a few days in Flat River recently.

Practical hats at reasonable prices—you'll find them at Mrs. S. C. Watts'.

Messrs. Dock and John Mackley of Farmington made a business trip to this section last week.

A lawn party was given at Mr. and Mrs. John Gordon's on last Friday night. Those who were present were Mr. and Mrs. Horn, Misses Iva and Violet Mullens, Ollie and Audrey Womack, Jessie and Hearty Bowling of Farmington, Jennie Coffey, Iva Johnson, Emma and Florence Bowline, Claud and Nora Cruse, and Messrs. Bradie Mullens of Flat River, John Gordon, Noah and Roy Wampler, Obrien and Geo. Smith, Clarence Wade, Charley Archenbeau, Hugh Kindwell, Elbert and Wimple Gordon, Willie Ragsdale, Amsie and Carol Vaughn, Orval and J. C. Hunter, Jay and Samuel Cowley, Jewel Bowling, Mertie Cruse, Acie Smith, Ralph Thomure and Everet Coleman. All had a fine time.

BRIGHTSTONE

We are having some spring showers at this writing.

Mr. Harry Klemp was a Brightstone visitor Wednesday.

Messrs. James Clark, Wm. Kessler and Oscar Kinneman made a business trip to Farmington Monday.

G. C. O'Bannon has purchased the C. B. Scott place near here.

All that's new in Millinery, at reasonable prices—Mrs. S. C. Watts.

Quite a number of Brightstoners attended church at Germany Sunday.

H. H. O'Bannon made a business trip to Knob Lick Monday.

Mrs. H. M. O'Bannon is reported some better at this writing.

Quite a number of Brightstoners and Germany youngsters Sundayed at Albert Klemp's. All reported spending a pleasant day.

There will be an entertainment and fruit supper at the Brightstone church Friday night, April 28th.

DAVIS CROSSING

Mrs. Walsh gave quite a successful entertainment on last Tuesday. All present had a good time and a good dinner. On the same evening the younger set had their good time at a party.

Mr. Carl Norwine and wife of Flat River were visiting Mr. and Mrs. Harris last Tuesday.

Correct styles in Millinery at the right price—Mrs. S. C. Watts.

Mr. Geo. Crocker is a man who deserves a great deal of credit for what his wife has done. She started right from the stump sixteen years ago. They went in debt for the land on which they have built their home. They have paid for it and raised a family of twelve children.

Mentioning the large family makes me think of the man from Yaller Creek down in Mississippi. He was convicted of selling whiskey. The judge asked him how long he had lived on Yaller Creek. He answered, 40 years. "And how many children have you?" The man answered, 14. The judge said, well if you have lived on Yaller Creek 40 years and raised 14 children, I think you have had punishment enough, so I am going to let you go home to your wife and children.

Quite a lot of enthusiasm over the lead prospects, as some parties are optioning their land at \$300 an acre. We are evidently in the heart of the lead district.

BISMARCK R. F. D.

The Cooley family and Miss Mattie Zapf motored to Farmington Sunday to visit Mrs. Gene Burgess.

Mrs. Mitchell of Bonne Terre visited Clardy Mitchell last week.

Misses Carrie and Reata Tulloch spent last week with their sister, Mrs. W. M. Mathis.

Mrs. T. H. Coxy is able to be out again.

Mrs. Finis Sinclair went to her home in Bellevue last week.

Mrs. Geo. Lindsey made a business trip to Bismarck Monday.

Mrs. Belle Bowman and Miss Annie Kintz of St. Louis visited the former's sister, Mrs. G. P. Lucas, Saturday and Sunday.

John Berthold of Desloge is with home folks.

Jas. Stewart of Arkansas is visiting at the home of H. L. Grider.

Practical hats at reasonable prices—you'll find them at Mrs. S. C. Watts'.

J. H. Hinz has purchased a new Ford automobile.

Misses Ruth and Lillie Matkin made a business trip to Elvins Saturday.

Mrs. Bessie Light and little son spent Monday and Tuesday with her sisters, Mrs. C. Matkin and Miss Maude Dent.

Messdames Henry Fisher, Winnett Fite and Miss Mildred Clark visited S. P. Dent and family last week.

S. P. Dent made a business trip to Farmington Wednesday.

Mrs. A. Stencil arrived last week to be at the bedside of her mother, Mrs. C. V. Coxy.

David Sherrill is at the home of his sister, Mrs. S. M. Beard.

DESLOGE

Miss Tessie Nixon visited in Farmington Saturday and Sunday.

The little son of Mr. and Mrs. Jas. Morris was quite ill the first of the week.

Mrs. Gilbert Pratt was brought home from the hospital in St. Louis Saturday night. She has greatly improved.

Dr. L. M. Reeves was a St. Louis visitor Sunday and Monday.

Mrs. Guy Sweet of Mine La Motte was visiting her parents, Mr. and Mrs. Mike May, of Cantwell the first of the week.

Ed Buchanan is having a house built on his lot in the south part of town.

Grandma Lindsey is critically ill at this writing.

Wes Buchanan bought a house in the south part of town from Mrs. Irvin Eaves Saturday.

Mr. and Mrs. J. S. Green of Leadington visited at the home of W. T. Green Sunday.

Misses Helen and Muriel Randolph visited at the home of Mr. and Mrs. Herb Murrill of Flat River Saturday and Sunday.

John Gardner of Cantwell has been critically ill of pneumonia the past week.

Mr. and Mrs. Gus Randolph and children were Flat River visitors Sunday.

The 19-year old son of Mr. and Mrs. Joe Degonia died at his home in Desloge Monday, April 17, 1916.

Alma, the three-year old daughter of Mr. and Mrs. Jas. Mitchell, fell off the porch and broke her right arm Tuesday. She is getting along nicely.

Louis Peter, the only child of Mr. and Mrs. Louis D. Casey, died in St. Louis Tuesday, April 18, 1916, age 9 months and 10 days. Interment was in Calvary cemetery, in St. Louis, Wednesday. We extend sympathy to the bereaved parents.

Mrs. Cora Turley is having the hotel repainted and repaired.

Mr. and Mrs. McCormick and daughter Vera, were visiting Mrs. McCormick's mother, Mrs. Frank Angrock, this week.

Wm. Maudson was on the sick list the first of the week.

Allen Sweet has sold his property in St. Francois and is now at the New Home Hotel.

Dr. J. G. Turley left last Tuesday for New York to enter school.

F. Kleppstattel is on the sick list this week.

Mr. and Mrs. Bert Smith left Thursday for their home in Belgrade, after a visit in Desloge.

Miss Pearl Morris of Bonne Terre Route 1 visited J. A. Thurman Sunday.

Mrs. John Thurman and daughters, Ethel and Audie were shopping in Bonne Terre Friday.

Mrs. G. Meyers and daughter, Irene, visited home folks Monday.

Gladys Hughes is spending a week in Farmington.

Miss Edna Cundiff of Farmington visited home folks here Saturday and Sunday.

Mrs. Henry Fischer and little son, Dorwood, left Tuesday for their home in Joplin.

Misses Ethel and Augusta Thurman and Alva and Grace Ward were Elvins visitors Sunday afternoon.

Walter Bouchard was a Flat River visitor Sunday afternoon.

Mrs. R. S. Kahn returned from St. Louis the latter part of last week.

Hazel Jordan made a trip to Leadwood Monday evening, returning Tuesday morning.

MINE LA MOTTE

Mr. Everett Taber's baby is on the sick list.

Mr. Al Pruitt got his right hand pretty badly mashed under ground.

The Katherine mines is working a large force of men at present.

A thief tried to force his entrance into the station agent's home last Thursday evening by cutting away the screen on a window, but was frightened away by the agent's wife.

The Mine La Motte Mining Co. is making great improvement about the plant. They are hiring lots of men.

Fredericktown is booming. The contractors want several masons and laborers at once.

Mr. Wm. Westbrook of Mine La Motte has held several good old-time meetings here of late.

Chas. Quinton moved to the Sherman Wright lease.

LICENSED TO MARRY

May 13th, Mike Tomjonie and Kate Srok of Flat River.

14th, Walter Spencer Merrell of Webster Groves and Elsie McLain Bridges of Lawton, Okla.

17th, J. C. Bird and Eva Thornton of Cantwell.

19th, Fritz Meyer of Ste. Genevieve and Cora B. Merritt of Elvins.

20th, Marion Jarrells and Nancy Kaen of Esther.

Efficient Use of Farm Machinery

Efficiency should be the watchword on the farm as well as in the factory. Owing to the exceedingly varied operations on the farm there is abundant room for inefficiency. In the factory a man is expected to do a certain amount of work and on the farm due to the widely varying conditions, it has been a hard and slow process to work out a set of standards.

Scarcity of farm labor has become a fixed condition, and the farmer must either reduce his acre or depend upon machinery. Since the earliest time of which we have any records man has exercised his ingenuity in devising implements to aid him in keeping the wolf from the door.

The promotion of food producers to food consumers grows constantly smaller. The 1910 census shows that out of total rural population of 49,000,000, only one-eighth or 6,000,000 are classified as farmers. This means that 6,000,000 are now producing food for one hundred million people. Compare this with conditions a century ago, when nearly the entire population were producers.

Efficiency and durability is the aim and modern extensive farming demands the best machinery and the most efficient use of the same. Machine efficiency has been largely responsible for the change over the conditions of a century ago. Each year shows advancement in this respect and there are some principles in respect to materials and methods of construction which must be recognized and adhered to as standard practice. As an example of what modern machinery and efficient methods can do, is shown by the record made by James F. Lawson of Carrollton, Mo., in making biscuits from wheat four minutes and 37 seconds after the binder entered the field.

No cut and dried rule can be laid down for the amount of machinery and power the farmer needs to a specified acreage. From an economical standpoint it is up to the farmer to study his conditions so as to make the most efficient use of his labor and that of his animals and to find out what point of machinery investment will give the maximum returns. I once heard Dr. Carver say "That the ideal farm was that size farm, which the family by using the best machinery and most improved methods, could make yield the largest returns."

This subject cannot be exhausted in one sitting. However, I am going to try to scratch it deep enough to make it bleed before time to escape. In order for me to do this I am going to prune the subject down to one or two things.

The Efficient Use of the Horse and Plow

The horse is the largest part of the motive power on the farm and much depends upon his efficiency. Almost one-half of the cost of production is made up of horse labor. Thus the question of economical management of the horse becomes a vital question. P. S. Rose, Editor of American Threshman, in a recent address at the Panama Exposition stated "That more power was used on the farm than all of the factories of the United States put together."

He shows figures from 1910 census to support this fact. Yet if the factories used their power as inefficiently as it is used on the farm, they would all be bankrupt in six months.

Power on the farm is an absolute necessity; but the question is then, how are we to obtain this power more economically?

Horse is the common source of power on the farm, but just how much power does he deliver? This point is not always clearly understood. As a matter of fact the power which a horse can deliver varies considerably and depends upon his size, muscular development and speed. A horse is able to exert a pull on his trace equal to one-tenth to one-eighth of his own weight and keep it up all day. A standard horse power by which all prime movers are compared is the ability to move 33,000 lbs. 1 foot per minute, or 1 pound 33,000 feet per minute. In other words a 1,500 pound horse moving at the rate of two miles per hour, four-fifths horse power, 1-1/2 miles per hour, three-fifths horse power. Using this as a basis it will be an easy matter to find out what a horse should be capable of doing.

Means of Increasing the Efficiency of Farm Machinery

1. Better care.
2. Better design—simple, ease of adjustment; reliable; durable; lubrication; accessible.
3. Adaptation.
4. Light of draft.
5. Standardize.
6. Better operation.

BETTER CARE—It is a well known fact that more machinery rusts out than wears out. There is a large economical loss each year due to the poor shelter and care which the farm machinery usually receives. The average life in this country is only about five years, while the average life of farm machinery in Germany is 10 to 12 years. (Example use of binder.) Charity covers a multitude of sins but not so many as are covered by paint. Paint makes even a plow of questionable character look perfectly good.

BETTER DESIGN—There are four points which must be kept in mind in the design of machinery. They are: simplicity, reliability, durability and accessibility.

ADAPTATION—A machine must be adapted to the purpose for which it is used. The greatest difficulty in the manufacture of a machine is not so much in getting a machine which is adapted to its work, as it is to adapt it to the average farmer, for all farmers are not gifted with equal mechanical ability. In other words, it must be as nearly "Fool Proof" as possible.

LIGHT OF DRAFT—A well designed machine eliminates all unnecessary draft as much as possible.

STANDARDIZE—The past year has shown marked improvement in this line, especially in farm wagons. This may sound you that in the past there have been 650 different wagon

boxes, 500 running gears and 7,300 combinations. These have been greatly simplified and reduced to three standard types, which will tend to reduce the price of wagons.

BETTER OPERATION—After all is said and done the efficient use of machinery depends upon good operation. Since the plow was the first implement invented for farm use, and as it is very often abused, I will take for illustration the possibilities of better operation.

The plow runs lightest when so adjusted as to allow the sole of the land side to run level from point to the heel. When made to cut wider, narrower, shallower or deeper than the adjustment of the plow ordinarily permits, the draft may be increased as high as 15 or 20 per cent. According to Sanborn, the plow shows the lightest draft when set to cut the widest furrow of which it is normally capable of doing.

The use of the coulter decreases the total draft. Sharpness of share and point may vary the draft as high as 45 per cent. The power absorbed in severing the furrow slice demands that shares be not only sharp but properly adjusted and sharpened. Sanborn also states that there is a difference in draft of 6.7 per cent in favor of the old point resharpened over a dull point on same plow and that there is a difference of 35 per cent in favor of a new point over the old one sharpened.

The total draft of a plow is the product of numerous factors each of which will vary under different circumstances. The location of the center of resistance varies somewhat with the character of the soil, shape of plow and size of furrow, but for average conditions it may be taken as a point on a line parallel to the land-side and 2 inches from it.

The true line of draft is always from this center to the point where power is applied, hence any inforced angle, such as caused by the sagging of traces, holding up the traces by straps, extending or shortening the beam and raising or lowering the draft pin in the clevis disturbs the adjustment. The total draft of a plow is the product of numerous factors each of which will vary under different conditions.

Factors Affecting Draft of Plow

1. Character and Quality of soil.
2. Amount of moisture.
3. Width of furrow.
4. Depth of furrow.
5. Shape of moldboard.
6. Finish of moldboard.
7. Method of hitch.

Comparison of Stubble Bottom Good Plowing—Width of Bottoms.

	14	16	18
Depth Draft			
in Av. Av. lb.	Av. lb.	Av. lb.	Av. lb.
ins. total	2 total	2 total	2 total
4	276	491	340
5	310	443	450
6	350	428	500
7	410	418	553
8	430	402	595

In summing up we find that the economic production of crops depends upon several factors. First adapting the size of the farms to the size of the family and amount of working capital, the use of efficient methods of tillage, use of proper size implements in accordance with the acreage farmed and the efficient care and operation of these implements. It is only by the use of more business methods and a close analysis of factors affecting the cost of production, that we can hope to secure the greatest returns for our labor. In other words use more horse sense on the seat and there will be less need for it in the collar.

Average Draft Per Foot of Width Various Farm Implements

Disk drill70 pounds.
Disk harrow75 pounds.
Drag harrow30 pounds.

A Wonderful Remedy That Saves Your Stock

Your sheep, hogs, cattle, horses and mules are subject to deadly attacks of worms. These ravenous pests multiply by the millions, starve your stock, keep them poor, weak, and out of condition.

SALVOET

The Great Worm Destroyer and Conditioner

Is a medicated stock salt that will rid every animal of your place of worms quickly and keep them worm free and healthy. No pay if it fails. No dosing, no drenching. Just put it where all your stock can run to it freely. They will doctor themselves, thrive faster, and put on money-making flesh. Salvoet is not expensive. We carry it in six sizes from 50c up. Come in and get a package to try. You will be pleased with the results. We guarantee it.

E. M. LAAKMAN, Druggist
